

REMOTE CONTROL SOLUTIONS

Native support on Windows, Mac & iPad
Multi-user sync across all D-Net devices
Crestron, Q-Sys, RTI & Control4 plug-ins
SMAART integration for system tuning

One application for all our products
Module library for speaker settings
Ability to configure offline & upload later
Multi-level device security settings

VR1

VR2*

PoE wall-mounted remotes for volumes, mutes, presets, sources, IP device control*, timed presets*, users and groups*
Configured in D-Net, stored in remotes.

iPhone & iPad remote app connects via WiFi. Adjust volumes, sources, presets & metering. Configure in D-Net, stored in a processor on your system for security.

THE HIGHEST UK AUDIO PEDIGREE

Founded in 2014 by a group of like-minded engineers from UK pro-audio pioneers BSS, Klark-Teknik, Turbosound and XTA, NST Audio is a family owned business headed by Dan & Sally Cartman and based in North Yorkshire, UK.

Dan Cartman, MD

5 YEAR WARRANTY

From the original D48 (now in its third generation!) to the cutting edge, ultra-flexible DM88, we design audio products that work capably and flawlessly. Suited for live sound, venue installs and high-end residential, you have our support.

LIVE, INSTALL AND RESIDENTIAL USE

All our products feature the highest quality ADCs and DACs, with sub-millisecond latency. Exceptional audio performance is a given, which is why we find our processing in not just live racks, but also installs that require the best sound and discerning residential systems alike.

DM88 System Processor

The System Tech's Toolbox.

Perfect for FOH duties as a highly capable System Manager and Console Switcher. Matrix and Routing, Speaker Management and Format Conversion. Simultaneous 16 Dante, 8 Analogue, 8 AES3 IO, Grouping & EQ Layers.

VMX88 Matrix Processor

Pristine Analogue IO with Dante.

Audiophile quality analogue inputs and outputs with additional Dante matrix and outputs. Three products in one - audio matrix, zone mixer & crossover (speaker management). 8 Analogue IO, 8 Dante IO plus GPI for fire alarm/preset recall.

VM016 Matrix Processor

Endless Expansion with Processed Dante Breakouts.

Audiophile quality analogue outputs with full processing capabilities. On its own or with VMX88, add more zones and mixing capabilities to your system. 16 Analogue outputs, 16 Dante inputs plus GPI for fire alarm/preset recall.

D48X Matrix Processor

Speaker Management with Matrix.

Now in its third generation with full front panel control of all parameters. Designed for live sound as the highest quality crossover and system EQ. 4 Analogue inputs, 8 Analogue outputs with IO pairs switchable to AES3.

ID48X Matrix Processor

Installation Friendly Version of D48X.

No compromise in audio quality, just no front panel control. Designed for installs as the highest quality crossover and system EQ. 4 Analogue inputs, 8 Analogue outputs with IO pairs switchable to AES3.

VMX88L Matrix Processor

Audiophile Analogue Matrix.

Three products in one - audio matrix, zone mixer & crossover (speaker management). 8 Analogue IO, plus GPI for fire alarm/preset recall.
